

Conversion table *K* to amplitude for *aa*

Mid-class amplitudes for L9 = 500 nT (L9 being the K=9 lower limit)

<i>K</i>	amplitude (nT)
0	2.3
1	7.3
2	15
3	30
4	55
5	95
6	160
7	265
8	415
9	667

Mayaud, P. N. (1980) - Derivation, meaning, and use of geomagnetic indices, *Geophys. Monogr. Ser.*, 22. AGU, Washington, DC.
